

# SMART HOME & BUILDING

---

KNX wireless products, smart home system.

Nowadays, a simple gesture is enough to turn all places smarter, ready to talk with you and to support all your desires, regardless of where you are. This is TECHLIFE Energy on Web, a constantly growing ecosystem of interconnected systems and smart products.

SMART HOME

SMART AUTOMATION

KNX AUTOMATIONS

Connected wiring series thanks to wireless 1-way switches and socket outlets. Turn on the lights, raise the roller shutters, and create customized scenarios: these are just some of the automations which make for a smart home.

TECHLIFE is a system of connected automation for the total control of the smart home. From a single point, you can control lights, temperature, sound system, curtains and roller shutter automation, irrigation, energy management and multi-zone thermoregulation.

Home automation based on KNX standard. The perfect solution for the electrical system to achieve more comfort and safety and fewer energy costs. Certified KNX products dialogue with third parties' products/systems thanks to the interoperability of the KNX standard.
